Work Experience

Zoominfo

VP of Engineering, AI & Emerging Technology Feb 2026 – Present

- Lead an executive R&D organization of 50 plus engineers, data scientists, and developers while overseeing enterprise AI architecture, a 9+ million dollar budget, and data governance under the CTO.
- Spearheaded production deployment of Model Context Protocols (MCP) and custom micro LLMs, generating multi million dollar revenue opportunities and cutting deployment cycles by 40%.
- Cut infrastructure compute costs by 25% through optimized edge node processing and standardized development workflows.
- Own the shift toward an "AI-ready" organization by overseeing the architecture of GenAI frameworks, internal AI strategy, and the integration of LLM workloads into production environments.
- Serve as direct technical advisor to C level executives and board members on strategic AI investments, governance, and enterprise platform positioning.
- Architected production-grade agentic AI workflows and modern MCP setups across enterprise GTM systems (Salesforce, CPQ, enrichment layers), accelerating lead-to-revenue execution and driving multi-million dollar gains in sales rep productivity.

Senior Director of AI, Analytics, & Innovation Apr 2024 – Feb 2026

- Set the AI and data science vision for the company, partnering directly with C-suite leaders to define the technology roadmap and build a culture of data-driven innovation.
- Direct the development and launch of new AI-powered tools (generative AI, automation, chatbots) that improve internal business operations and core features of ZI's product platforms.
- Partner with VP, SVP, and C-suite executives to define technology roadmaps, align innovation initiatives with business objectives, and ensure seamless integration of data-driven solutions.
- Manage the entire lifecycle of our most innovative solutions, taking them from initial concept and R&D all the way to successful deployment and real-world application.

Director of Data Science Jan 2023 – Apr 2024

- Collaborated closely with the executive team and CHRO to identify key strategic requirements and define the people analytics vision, aligning it with overarching organizational objectives and driving data-informed HR strategies.
- Directed the creation of executive-level reports and dashboard analytics, translating complex data into actionable insights that informed key strategic decisions and influenced business outcomes.

Columbia University | New York University, *Adjunct Professor* Mar 2024 – present

- Teaching Core Methods in Educational Data Mining an introductory course for the MSc in Learning Analytics at Teachers College, Columbia University and Being Digital: How the Internet Works and Why It Is Important at New York University

Stanley Black & Decker , *Director of Data Science, People Analytics* May 2021 – Jan 2023

- Established and maintained a world-class cloud-based environment platform to support enterprise-wide data science and advanced analytics solutions.
- Partnered with Product Managers and AI Engineers to lead a team of data scientists in identifying opportunities and building data pipelines and services impacting over 70,000 employees, driving significant improvements in human capital management.
- Served as a trusted advisor to VP+ business partners, identifying high-value projects that created corporate value and delivered significant business impact through a comprehensive suite of data science products.
- Oversaw a budget of approximately $2 million for people analytics and data science initiatives, ensuring effective resource allocation and maximizing ROI.

Reckitt , *Global Head of Analytics* Mar 2020 – May 2021

- Led the HR analytics function and enterprise data architecture implementation, driving workforce productivity for 45,000+ employees by delivering scalable AI and data-driven insights to business leadership.

IBM , *Sr. Data Scientist, Cognitive Solutions & People Analytics* May 2019 – Mar 2020

- Partnered with leadership and cross-functional teams to design and deliver advanced predictive analytics solutions that improved organizational effectiveness for over 330,000 employees.

Google (BrightBytes)

Research Data Scientist Aug 2018 – May 2019
- Developed/maintained machine-learned Early Warning System to predict high school dropout for over 1 million students (grades 1-12), providing intervention insights.

Jr. Data Scientist Aug 2017 – Aug 2018
- Established data methodologies, core metrics, and statistical modeling frameworks to support future solutions, thereby creating a robust foundation for data-driven innovation.

TriAd Media , *Data Scientist* Apr 2015 – Aug 2017
- Created and deployed predictive lead scoring models utilizing both supervised and unsupervised machine learning methods.

New York University , *Instructional Designer* Jan 2013 – Apr 2015
- Designed instructional media aligned with course objectives and created assessments to monitor student progress throughout the curriculum.

Florida State University

Systems Administrator Jan 2008 – Feb 2013
- Partnered closely with cross-functional teams to facilitate software deployments, hardware upgrades, and backups, ensuring optimal system performance and seamless user experiences for over 500 employees.

Network Specialist Jan 2008 – Feb 2010
- Installed and maintained low-voltage wiring for voice and data networks across the university campus, ensuring reliable connectivity for the entire university community.

Education

Columbia University, *Ph.D., Cognitive Science & Machine Learning*

Columbia University, *M.Sc., Learning Analytics*

New York University, *M.A., Administration, Leadership & Technology*

Florida State University, *B.Sc., Social Science*

Skills

AI & Emerging Technologies
Generative AI Tools, Large Language Models (LLM), Chatbots, Agentic Automation, Custom Application Development, MCP deployment

Cloud Platforms & Infrastructure
Google Cloud Platform (GCP), Data Architecture, Data Pipelines, Cloud-based Environments, Scalability & Performance, Terraform

Data Science & Business Insights
Machine Learning, Predictive Analytics, Statistical Modeling, Big Data Analytics, Data Mining, Business Intelligence, Metrics, KPIs & ROI Value Demonstration

Innovation & Transformation
Digital Transformation, Process Optimization, Continuous Improvement, Emerging Trends & Technologies, Competitive Benchmarking

Executive Leadership
Strategic Planning, Cross-functional Collaboration, Stakeholder Management, Executive Reporting

Research & Methodology
Experimental Design, Survey Design, Data Collection & Consolidation, Statistical Analysis, Insights & Reporting

Certificates

Blended Online Learning and Teaching | IBM Product Manager: Define, Build & Deliver | IBM People Analytics Practitioner | IBM People Analytics Essentials | IBM Machine Learning | IBM Cognitive Statistics | PPL - SEL / SES | SCUBA: Advanced Open Water/Nitrox

Selected Publications

Frame-Conditioned Moral Computation in LLaMA 3.1-8B-Instruct: A Mechanistic Interpretability Audit of Ethical Reasoning
